

Hannah Mackie  
Running for:  
Vice President of Governance and Legal Affairs

I am Hannah Mackie, a third year Business student in the Organizational Studies stream. I am running for this role, because I believe I would be a positive addition to the current executive team. I have various related experience to this position through my educational focus on Human Resources, to supervisory and administrative experience through my current job. I have had experience as a Director-at-Large for NUSU, which provides me knowledge of our Union's current goals and operations.

If elected, I have goals I would like to accomplish in this position. Starting with a more balanced representation of our student population. Our student population is approximately 70% comprised of female identified students, however, all four of our current executives are male identified. Through working with them in the past I can say they all do fantastic work, but I would like have a more diverse group representing all of us students.

My other goal for the organization is to create better flow from year to year. I would do this through creating an on boarding program for incoming executives that would be more interactive and comprehensive. There is a large learning curve to any of the executive positions, and I believe that to have a less interrupted transition period the organization can function more efficiently and better as a whole.

A large part of the role is student advocacy, which can mean assisting in appealing grades, assisting with complaints and issues for students, in a way that is only about the interests of the students. I feel strongly about equal opportunities and student welfare. Through my experience, education, and interest in this field, I feel like I will excel in this team, the organization and representing all students.

If you want someone who is serious about this position and supporting and promoting the student image, then vote for me, Hannah Mackie.
